**Agenda items:**

**1. Comins Lake Project (for possible action)**

Presentation by Jack Robb, NDOW regarding improvements at Comins Lake. Current expenditures are right at 700K to complete improvements. Looking for ways to fund the improvements. Noted a 3-1 match from the Pitman Roberts Government Funding for all donations. Noted the economic drive towards tourism. Also suggested looking to local mines for donations. Robb, NDOW also suggested joining with additional neighboring CAB's to impact the request. Goal is to complete the project in full; however, if project runs short on funds, phasing or cuts may be required

Board member Boren asked if this project would qualify for the NDOW Heritage Grant funds. Robb confirmed, but reminded the board of the submission deadline as March 1.

Public comment: BJ Alberg noted that the project cost estimate will need to be updated and can be altered if not enough money is raised. Bill Miller added that there are several items on the list that can be financially adjusted/reduced. Solar over power, smaller cattle guard are just a few examples.

Wade Robinson noted that he'd like to see the project go forward regardless of the cuts that will have to be made. Jon Alberg, NDOW asked Robb to elaborate on the funding and how it can be allocated. Robb, NDOW confirmed that labor saving is also an option if we piggy back on additional projects or purchases.

Board member Boren asked Bj if alternative boat dock options were available and if so would it delay the project if modifications are made. Bj confirmed that yes alternative plans are available and no it should not delay the process. Bj asked if "float funds" are available and is it an option to phase the project to address funding shortages. Robb confirmed that yes "Float funds" are available but he'd prefer not to phase out the project because it has already been delayed. Adam Henriod, NDOW reminded that there is a number of labor projects that NDOW can complete or help to complete. The 3-1 match can be affected if phase option is enacted. Wade Robison asked about SIPLMA money as an option for some of the shade, picnic projects.

Rodd Lighthouse, NDOW questioned whether or not a boat launch and a dock were necessary Wade Robison noted that older generation can't get in a boat without a dock. Several options to reduce cost were shared by the public. General public consensus was in favor of the project. Robb, NDOW noted that he isn't trying to "gold plate" anything. He is after an acceptable project at an affordable cost. Henriod, NDOW commented on the sunny side floating dock; noted that during a storm in 2014 the ramp was severely damaged and remains un-repaired. It would be his recommendation to put the best possible dock in that we can afford. Alberg, NDOW asked if we are out soliciting funds as an option to "donate" selective cost ie.. picnic area for which they do material and labor would this be eligible for the 3-1 match. Robb, noted he'd have to confirm.

Robison, willing to step up and volunteer labor and cost to complete the project. Board member Boren asked for volunteers to go after donations and suggested the board complete the NDOW Heritage Grant fund application. Board recommends moving forward with funding attempts and moving forward with bidding out the project as is. If the funding isn't collected then options to reduce cost will be addressed. Board Chairman Sawyer confirmed that Mitch will get on the Mt. Wheeler Power agenda for a donation request. Sawyer will reach out to the local mines for donations. Boren will complete the NDOW Heritage Grant Fund application and Jon will be the contact person for financial contributions.

Robb suggested a conference call with the group next week to begin.
